Debjeet Das
Developer

Diligent and driven college student looking to leverage my programming and problem-solving skills to solve coding problems and develop and test complex software. Wrote articles on flutter cross platform development and developed multiple projects in python, java and flutter. Eager to further develop further programming skills and work and co-ordinate in a team.

WORK EXPERIENCE

Flutter developer intern
Easyleasy Home Ventures Private Limited
07/2022 - 12/2022   *Remote*
I was in charge of developing 2 flutter apps from scratch and connecting one of them to firebase to save and retrieve data.

Achievements/Tasks
- Developed 2 full user interfaces by working closely with the UI/UX team. Worked on custom animations, to make the user experience smoother. Partly integrated one app with firebase to implement posting feature, comments and authentication.

Flutter developer intern
Awto.ai
05/2021 - 07/2021   *Remote*
The company provides parking space locations, using their app or their website, parking payment.

Achievements/Tasks
- Upgraded their operator and user apps to the recent standards. Worked with the backend team to implement the functionality of listing the user's payment history, listing all the users in the operator app and saving new parking data to the backend.

SKILLS

Flutter · Dart · Python · Kotlin · Java · Javascript · HTML · CSS · MySQL · Spring

PERSONAL PROJECTS

BIT training and placement website scrapper (07/2023 - 08/2023)
- A scrapper made using java, which would scrape the list of jobs from the BIT TNP website, and upload jobs and notifications to firebase. The java program runs periodically and updates the newly added jobs or notifications to firebase.
- The flutter app reads the data from firebase and displays it in the app, with the added functionality of sending a notification to all users whenever a new job or notification is added.

Flutter Expense Tracker (01/2022 - 02/2022)
- An expense manager to track the users expenses and incomes and help them manage their money. Using Flutter framework for frontend and firebase as backend with bloc as state managment.

Python password manager (02/2021 - 09/2021)
- Python password manager to save a user's password securely, backup and restore them and also generate new strong passwords.

Python newspaper downloader (07/2021 - 08/2021)
- Automatically download the newspapers you choose from the web, using python web scraping and save it in an organized order.
